Job Description

Requisition Number 10-0072

Job ID: 972285

Post Date 5/17/2010

Title Field Technician
anywhere

Description ENTRIX is seeking natural resource scientists to work in a temporary capacity with a multidisciplinary team of accomplished biologists, chemists, economists, geologists, GIS technicians, and planners to work on a Natural Resource Damage Assessment (NRDA) for a major oil spill NRDA in the Gulf of Mexico.

Responsibilities include, but are not limited to:

1. Assisting and supporting NRDA Team Leader
2. Assisting with sampling of media such as water, biological resources, and sediments and assisting with other field studies
3. Data retrieval and processing
4. Recording observations and data entry

Requirements Basic Qualifications:

1. This position is targeted to individuals with training in biology, aquatic science, water quality, geology/hydrogeology, or related environmental sciences.
2. Experience with sampling in intertidal environments; wetland experience is a plus.
3. Ability to work in remote areas and in occasional adverse weather conditions.
4. Must be organized and able to keep detailed, accurate field notes.
5. Must be able to communicate effectively with task and project leaders.
6. Must be able to read maps and follow directions.
7. Must be willing and physically able to work outside in and around streams, rivers and wetlands, and open waters in the Gulf of Mexico in hot humid conditions.
8. Must be willing to work a flexible schedule including weekends.
9. Must be reliable and responsible.
10. Must be authorized to work in the U.S. without company sponsorship.
12. Oil spill experience a plus.

Desired Qualifications:

1. Ability to work well independently while maintaining communication with staff stationed in various locations.
2. Previous experience/training in marine and estuarine environments is preferable but not required.
3. One to two years experience conducting field work is preferable.
4. First Aid training current within two years and Adult CPR training current within one year
5. Prior HAZWOPER training (initial 24 or 40-hour) a plus
6. Solid time management and follow-through skills
7. Positive and energetic attitude

If you have further questions, please feel free to email me at ikulberg@entrix.com otherwise, please visit our website and apply on line for this position.

Skills

Should be willing to go in the field for several weeks at a time. Experience working on oil spill is a plus.

Company Description: Environmental and Natural Resource Management Consult
